WORK EXPERIENCE

StatusQuote
April 2017 – Present
Senior Software Engineer
Orlando, FL

- Collaborated on the design and development of a user-friendly food service design application and CAD drawing editor using Figma, .NET C#, and Angular.
- Constructed and upgraded several applications within a medical claims review system, enhancing operational efficiency through the utilization of HTML, CSS, and JavaScript.
- Created a .NET-based report generator to display comprehensive application usage data.
- Enhanced the interface of a customizable workflow automation tool with ASP.NET and Adobe XD.
- Contributed to the front-end development of an enterprise resource management application used for accounting, budgeting, and analytics reporting.
- Assisted in designing and implementing an Angular based PDF editor and viewer.
- Crafted engaging custom CSS animations and assets using Photoshop and Illustrator
- Designed wireframes and mockups using Figma and Adobe XD for an Angular-based application tailored for creating customizable applications.

Publix Supermarkets
July 2012 – June 2017
Customer Service Staff
Orlando, FL

- Supervised front-end operations, including cashiers, customer inquiries, and store cleanliness.
- Managed cash office opening and closing procedures, including register setup and reconciliation.
- Assisted customers with returns, check cashing, money services, and lottery transactions.

Walmart
July 2011 – July 2012
Customer Service Staff
Orlando, FL

- Led front-end operations and managed cashiers, customer concerns, and store cleanliness.
- Provided customer support for returns, check cashing, financial services, and lottery transactions.

EDUCATION

University of Central Florida
May 2023
Bachelor of Science, Computer Science
Orlando, FL

- Led a team of six to complete a mobile based roommate finding application that included a matching and messaging service using React Native, Node.js, and WebSocket.
- Developed a responsive recipe finding application using React.js in a MERN stack and third-party API to gather recipes based on user entered recipe items.
