PROFILE

Innovative Senior Software Engineer with expertise in front-end development and a passion for creating user-friendly applications. Proficient in JavaScript, TypeScript, and .NET technologies. Skilled in Agile methodologies and UI/UX design principles.

WORK EXPERIENCE

StatusQuote   **April 2017 – Present**
Senior Software Engineer   *Orlando, FL*

- Spearheaded the design and development of a user-friendly food service application and CAD drawing editor, leveraging Figma, .NET C#, and Angular.
- Enhanced operational efficiency by upgrading applications within a medical claims review system using HTML, CSS, and JavaScript.
- Developed a robust .NET report generator to display comprehensive application usage data.
- Improved the interface of a workflow automation tool using ASP.NET and Adobe XD.
- Contributed to front-end development of an enterprise resource management application for accounting and analytics reporting.
- Assisted in designing and implementing an Angular-based PDF editor and viewer.
- Created captivating custom CSS animations and assets using Photoshop and Illustrator.
- Designed wireframes and mockups for an Angular-based application tailored for customizable applications using Figma and Adobe XD.

Publix Supermarkets   **July 2012 – June 2017**
Customer Service Staff   *Orlando, FL*

- Supervised front-end operations, including cashier management, and ensuring store cleanliness.
- Managed cash office opening and closing procedures, including register setup and reconciliation.
- Provided support for various customer transactions, including returns, check cashing, and lottery.

Walmart   **July 2011 – July 2012**
Customer Service Staff   *Orlando, FL*

- Led front-end operations, overseeing cashiers, and ensuring store hygiene.
- Provided customer support for returns, check cashing, and lottery transactions.

EDUCATION

University of Central Florida   **May 2023**
Bachelor of Science, Computer Science   *Orlando, FL*

- Led a team in developing a mobile-based roommate finding application using React Native, Node.js, and WebSocket.
- Developed a responsive recipe finding application using React.js in a MERN stack and integrated third-party APIs for recipe data retrieval.
