Summary

Experienced Software Engineer with a strong background in JavaScript, TypeScript, Angular, and React. Specializing in scalable, high performance web applications and intuitive user interfaces. Skilled in optimizing front end architecture and applying modern technologies to drive impactful, user focused solutions. Proven ability to lead development projects, mentor engineers, and collaborate with cross functional teams to achieve business goals.

Skills

- **Programming Languages:** JavaScript, TypeScript, C#, SQL, Python, PHP, C
- **Front-End Development:** Angular, React, HTML5, CSS3, SASS/SCSS, Webpack
- **UI/UX & Design:** Figma, Adobe XD, Photoshop, Illustrator, Responsive Web Design
- **Development Tools & Workflow:** Git, NPM, Jira, Azure, SharePoint, Babel, Visual Studio, VS Code
- **Back-End Development:** Node.js, .NET, Express.js, RESTful APIs, SOAP, MongoDB, MySQL
- **Testing & Debugging:** Unit Testing, Browser Development Tools, Debugging Best Practices
- **Engineering Practices:** Agile (Scrum/Kanban), CI/CD, Code Review, Technical Documentation, Team Leadership

Experience

Senior Software Engineer | StatusQuote | Orlando, FL | April 2017 – Present

- **Developed** scalable, user-focused applications using Angular, Figma, and .NET, improving system efficiency.
- **Led** front-end decisions, ensuring optimized performance, maintainability, and scalability across multiple projects.
- **Designed and built** a high-performance Angular-based PDF editor, streamlining document processing.
- **Enhanced** the UX of an automated workflow tool using ASP.NET and Adobe XD, increasing user engagement.
- **Standardized** coding practices for a large-scale system migration, improving team efficiency and maintainability.
- **Mentored** junior engineers through structured code reviews, pair programming, and knowledge-sharing sessions.
- **Integrated** new technologies into existing systems, improving performance, scalability, and security.
- **Collaborated** with product managers and designers to translate business needs into technical solutions.
- **Developed and maintained** RESTful APIs with authentication, like JWT, for secure data exchange.
- **Authored** detailed technical documentation for system architecture, APIs, and development best practices.

Projects

Roommate Matching App

- **Developed** a mobile app that improves roommate-matching accuracy based on user preferences.
- **Implemented** real-time messaging using WebSocket for instant communication.
- **Designed** an intuitive UI/UX for seamless user experience.

Recipe Finder Web App

- **Built** a responsive React.js app that integrates a third-party recipe API to suggest meals based on ingredients.
- **Implemented** dynamic filtering and search features to enhance the user experience.
- **Designed** an accessible and mobile-friendly UI.

Education

University of Central Florida | Orlando, FL

Bachelor of Science in Computer Science
