Summary

Experienced Software Engineer with expertise in JavaScript, TypeScript, React, Angular, and .NET. Passionate about building scalable applications, improving UI/UX, and integrating modern technologies. Adept at collaborating with cross-functional teams, mentoring engineers, and driving efficient development practices.

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SASS/SCSS, C#, SQL, Python, PHP, C

Frameworks & Libraries: React, Angular, Node.js, .NET, Express.js, Webpack

Development Tools: Git, NPM, Jira, Azure, SharePoint, Babel, Visual Studio, VS Code

Backend & APIs: RESTful API Integration, SOAP, MongoDB, MySQL

UI/UX & Design: Figma, Adobe XD, Photoshop, Illustrator, Responsive Web Designs

Testing & Debugging: Debugging techniques, browser dev tools

Methodologies: Agile (Scrum/Kanban), Code Review, Technical Documentation

Collaboration: Strong communication, teamwork, problem-solving, adaptability

Experience

Senior Software Engineer | StatusQuote | Orlando, FL | April 2017 – Present

- Developed **scalable, user-focused applications** (food service app, CAD editor) using Angular, Figma, and .NET.
- Led **front-end architecture decisions**, ensuring optimized performance and maintainability.
- Designed and built a **high-performance Angular-based PDF editor** for seamless document handling.
- Enhanced the UX of an **automated workflow tool** using ASP.NET and Adobe XD.
- Standardized coding practices for a **large-scale system migration**, improving team efficiency and maintainability.
- Mentored junior engineers through **code reviews, pair programming, and knowledge-sharing sessions**.
- Integrated **new technologies** into existing systems to improve performance, scalability, and security.
- Collaborated with product managers and designers to translate business needs into **technical solutions**.
- Developed and maintained **RESTful APIs with authentication (JWT)** for secure data exchange.
- Authored detailed **technical documentation** for system architecture, APIs, and development guidelines.

Projects

Roommate Matching App

- Developed a **mobile app** that improves room-mate matching accuracy based on user preferences.
- Implemented **real-time messaging** using WebSocket for instant communication.
- Designed an intuitive **UI/UX** for seamless user experience.

Recipe Finder Web App

- Built a **responsive React.js** app that integrates a **third-party recipe API** to suggest meals based on ingredients.
- Implemented **dynamic filtering and search features** for better user experience.
- Designed an accessible and mobile-friendly UI.

Education

University of Central Florida | Orlando, FL

Bachelor of Science in Computer Science
